
No Fear NFTs

ERC721 standard DeFi extension
*Scams and questionable projects become a
thing of the past*

Why I don't buy NFTs?

- Fear!
 - Scams
 - Rug-pulls
 - Bear Market
 - Low floor prices
- Solution?
 - Confidence

nfNFTs:

Key Features (I)

- **ERC-721 extension**
Embedded DeFi primitives
- **Staking → LSD Tokens**
Minting fee defined in ERC-20 LSD
- **Burn-to-withdraw**
Exit window at any time
- **Unlimited minting price**
Collection owner define a minimum minting price

nfNFTs:

Key Features (II)

- **Early-burning penalties**
Promote holding
- **Add funds at any time**
Increase investment and value of the NFT
- **Withdraw funds / rewards**
Leaving a minimum amount
- **No more low floor prices!**
Just doesn't make sense!

Remember

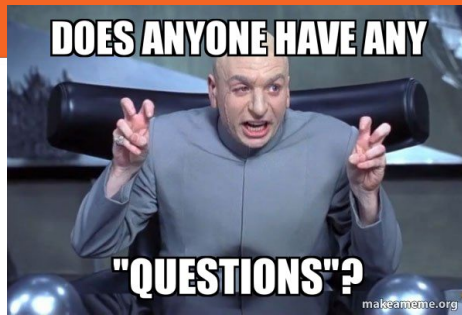

This is just a proof of concept.

UI will be improved and contracts audited before launching 😊.

The background of the image shows the silhouettes of several people sitting on a balcony or in a high-rise office, looking out at a city skyline. The most prominent building in the skyline is St. Paul's Cathedral in London, with its large dome clearly visible. The scene is dimly lit, suggesting it might be dusk or dawn, with the city lights providing a soft glow in the background.

Which NFT standard would
you buy as user?

Life brights more with
no fear.

Thank you!
